Profile

Aspiring data analyst with 10 years of experience in the hospitality industry, including three years as an Assistant Bar Manager at Harvey Nichols. Skilled in operations management, problem-solving, and data-driven decision-making. Passionate about data analytics, currently studying economic market data and investing in crypto stocks.

Completed the Google Data Analytics Certificate, gaining proficiency in SQL, Python, and Excel. Eager to leverage analytical skills and hospitality expertise to transition into a data analyst role.

Skills

Programming & Scripting: Basic Python (AI-assisted stock market scripts), R (Currently learning)

Data Analysis & Manipulation: SQL, Spreadsheets (Excel, Google Sheets)

Data Visualization: Tableau (In Progress)

Databases: Basic SQL

Other: Data Cleaning, Business Intelligence, Trend Analysis

Experience

Bar Supervisor – Harvey Nichols, Birmingham, UK — 2022–Present

• Supervised **daily bar operations**, managing stock levels and reducing waste through inventory analysis.

• Collected and **analyzed sales data** to identify customer preferences and optimize beverage offerings.

• Maintained **financial accuracy** by managing payments and monitoring float balances.

• Trained and **mentored bartenders**, improving team performance and service quality.

• Developed a keen eye for identifying **patterns in sales trends** and customer behavior.

Bartender/Bar Manager – Bourne & Co, Birmingham, UK — 2018-2020

- Led a **team of bartenders** and managed stock to ensure optimal product availability and cost control.

- Participated in **data-driven decision-making**, analyzing sales reports to adjust inventory and pricing strategies.

- Assisted in positioning the bar among the **Top 100 UK Cocktail Bars** through customer engagement initiatives.

- Balanced multiple responsibilities in a **high-paced environment**, refining problem-solving skills.

Sushi Chef – Haiku, Kraków, Poland — (2013 - 2017)

- Maintained strict **quality control** by tracking ingredient freshness and optimizing food preparation processes.

- Managed **inventory efficiently**, reducing waste and ensuring cost-effective ordering.

- Gained precision and attention to detail by crafting intricate sushi dishes to high standards.
